Course: Salesforce

Sindhu.S

AAL18EC049

## • Application lifecycle and Development Models.

- Use package Development for More flexible Releases

learned objectives:-

→ Identify key differences between package development and Change Set development.

→ Describe what a package version is and how it helps you manage change in your org.

→ Summarize why you don't have to track Setup changes manually when using the package development Model.

## • Change Set Development:-

1. Plan for changes to your org.

→ Create a new Sandbox

→ establish a method for tracking changes made in a release.

Course:- Digital signal processing I:  
Basic concepts and Algorithms

Sindhu. S

AA18EC049

- Signal processing Meets Vector space.
  - Introduction
  - Signal processing & Vector Spaces.
- Vector Spaces:-
  - Introduction
  - Vector Spaces
  - Signal Spaces.
- Bases :-
  - Introduction
  - Bases.
- Subspaces and approximations.
  - Introduction
  - polynomial Approximation.
- Notes and Supplementary Materials.
  - Signal of the Day : Explained hunting.
- python notebooks
  - Haar Bases for image compression.
  - Feedback wk2.
