4th Sem, 'A' Sec.

- JQuery is a fast, small, and feature-rich java script library.

```
var el=document.getElementById("start");
el.innerHTML="40";
```

- Selectors

- Attributes and Content

- get and set Attribute values.

```
<a href="http://www.sololearn.com">
```

```
</a>
```

- Removing attributes

```
$("#table").removeAttr("border");
```

- get & set content:

Ex:- <p>

JQuery is so fun </p>

</p>

- val()

```
<input type="text" id="name" value="Your Name">
```

- Adding Content:-

```
<p id = "demo"> Hi </p>
```

- Manipulating CSS

→ Adding and Removing classes

- Manipulating CSS

```
<div> Some text </div>
```

CSS :

```

header {
  color : blue;
  font-size : x-large;
}

```

- CSS properties:-

HTML :

```
<p> Some text </p>
```

CSS :

p {

```

background-color : red;
color : white;
}

```

Js :

```

function() {
  alert($("#p").css("background-color"));
  $("#p").css("background-color", "blue");
}

```
